AI Evaluation | Analytics | Digital Strategy

Philadelphia, PA | 215-840-8413 | Rayaaron94@gmail.com | linkedin.com/in/aaronray94 | github.com/rayaaron1994

SUMMARY

AI evaluation professional with hands-on experience assessing model outputs, resolving ambiguous cases, and improving quality workflows. Completed Per Scholas AI-Assisted Business Intelligence training and currently continuing technical development through LaunchCode by Hire Human. Working knowledge of Excel, GitHub, Python, SQL, and Power BI, paired with a background in digital content, social media, and visual storytelling.

CORE SKILLS

AI & Quality: AI model evaluation, output QA, edge-case analysis, text classification, data quality, process documentation
Data & Technical: Excel, GitHub, Python, SQL, Power BI, data cleaning, dashboard fundamentals, relational analysis
Content & Marketing: digital strategy, social media, copywriting, photography, video, visual communication, performance reporting

PROFESSIONAL EXPERIENCE

Innodata - Quality Assurance Lead, AI Data Model Evaluation | Remote | 2024-2025

- Led quality assurance for large-scale AI evaluation workflows involving customer review data for a major e-commerce platform, validating system-generated outputs for accuracy, consistency, and contextual fit.
- Identified model drift, hallucinations, factual inaccuracies, and ambiguous or edge-case responses; documented and escalated issues that could affect downstream data quality.
- Served as a subject matter expert and escalation resource for complex output decisions, helping reviewers apply evaluation standards more consistently and improving process documentation.

Innodata - Social Media Content Moderator | Remote | 2021

- Reviewed and classified high-volume user-generated content for a major social media platform under detailed policies and strict turnaround requirements.
- Applied classification guidelines to complex cases and tracked review volume, accuracy, and recurring content patterns in Excel.

City of Philadelphia, Mayor's Office of Civic Engagement - Digital Strategy Intern | Philadelphia, PA | 2018

- Managed social media and digital content across Facebook, Twitter, and Instagram; created photography, graphics, copy, video, and performance reports, growing the office audience by approximately 80% over four months.
- Conceived, filmed, and edited a volunteer recruitment video that remained in use by the office after the internship.

SELECTED PROJECT

Prompt Bench - Multi-Agent AI Evaluation System | Independent Project | 2026

- Built a functional Streamlit system that sends one prompt to OpenAI, Claude, and Gemini, then uses blind evaluation to compare responses across factual accuracy, completeness, relevance, tone, and clarity.
- Implemented synthesis, final QA, automatic revision attempts, provider-error handling, tie logic, and structured run logging for later analysis.
- Designed the project around AI quality principles: compare outputs, preserve strong contributions, validate the final answer, and avoid treating any single model as automatically trustworthy.

TECHNICAL TRAINING

Per Scholas - AI-Assisted Business Intelligence | 2026

- Hands-on labs and projects in SQL, Python, Excel, Power BI, data cleaning, dashboard development, and relational analysis including joins, CTEs, and window functions.

LaunchCode by Hire Human | In Progress | 2026

- Continuing project-based technical development while expanding programming, data, and applied technology skills.

EDUCATION

Lincoln University - Business Management Coursework | Oxford, PA
